

PUSH PLUS+

\*The three items shown above are examples of customized products.

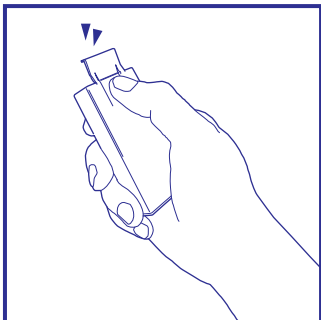

## Make "Opening" More Fun

How can we make opening something more fun? Under this concept, we developed a supplementary case.

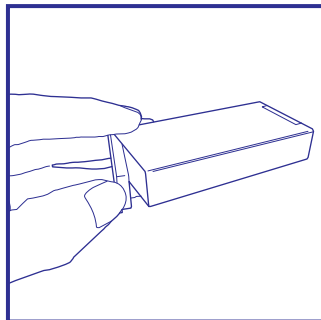

We designed the case so that opening it would be hard to figure out; consequently, the case is quite a unique item that is definitely not for everybody. The feeling of surprise upon opening the case and the comforting click of the lid are part of the product's appeal. Available in a variety of colors, this product can be customized and made your own.

Perfect for storing mints or other tablet-shaped items.

### How to use

Press the upper part of the case as shown in the picture above.

[Instructions on opening the bottom lid]  
When adding contents, remove the bottom lid as shown in the picture above.

\*When closing the lid, be sure to press firmly until you hear a click.

PUSH PLUS+

## Supplementary Case

Material: Polypropylene  
Upper temperature limit: 100°C  
Lower temperature limit: -30°C  
Size: W41 (w) x 16.5 (d) x 81 (h) mm  
Capacity: 38 ml

12×6.5mm

Size of opening  
Actual size

### [Precautions]

- Do not place near fire.
- Do not apply excessive force to the case. Doing so may cause the case to break.
- When storing the case, avoid exposure to direct sunlight and store in a cool place.
- If a problem is detected with the case, discontinue use.
- When storing items that absorb moisture or change properties easily, try to eat or use the items quickly.
- Do not store items in the case over an extended period of time.
- We reserve the right to make improvements by changing the shape or color of the product without prior notice.
